

Technical Data Sheet

Product
M-569

Description

M-569, Tris(2-Hydroxy Ethyl) Isocyanurate Triacrylate (THEICTA), is a solid monomer which has fast cure speed, high Tg, high hardness, good abrasion resistance, excellent adhesion, heat resistance properties.

Applications

UV Coatings
UV Inks
UV Adhesive

Features and Benefits

M-569 delivers the following features and potential benefits:

Features	Advantages and Potential Benefits
Adhesion	Excellent
Tg	272 °C
Abrasion resistance	Excellent
Heat resistance	Excellent
Hardness	High
Non-yellowing	Excellent
Water resistance	Excellent
Chemical resistance	Excellent

Typical Properties

Appearance	White solid
Viscosity(mPa·s@25°C)	N/a
Color(APHA)	30
Functionality	3
